# Ideas for the kitchen

---

# Beautiful moments with water

hansgrohe is a brand for life. Whether you are looking for a moment of calm, refreshment or reliable clarity, every product we make is designed to make life easier. Our products are not one-off ideas but comprehensive solutions, destined to become integral to everyday life. It's this that defines our brand: our focus on people.

## Feel-good innovations

We have developed a range of exciting and exhilarating kitchen products that deliver on our guiding principles: **innovation**, **design**, **quality** and **responsibility**. We offer solutions to every need, by designing cutting-edge products to suit every lifestyle. Meet the sustainable kitchen innovation Aqittura M91, which can filter, mineralise, carbonate or cool water for natural balance minus the heavy crates and plastic waste. Or there's the minimalist Zesis M33 kitchen tap, with its many comfort functions at a great price. And the Aquuno Select M81, the all-in-one concept for the perfect kitchen flow.

# Our principles – your enjoyment

## Driven by innovation

At hansgrohe, your needs come first. As a leading company in our industry, we are constantly striving to answer the demands of everyday life with new technical developments in the kitchen. We believe every part of a product is important, from the look and functionality to the quality of the materials we use. This attention to detail is reflected in over 15,000 active patents, and the result for you is more comfort, safety and pleasure in your kitchen.

## Design – developing excellence

Elegant functionality appeals to both the heart and mind, and it's something we specialise in with your kitchen. Our products are consistently award-winning, outlasting fads and instead providing long-lasting value, whether they are found in the home or in a world-famous hotel. Good design makes all the difference and always ensures an excellent experience. With over 30 years of collaboration with Phoenix Design, hansgrohe is a leader within the industry, racking up more than 700 awards for our design achievements.

# Quality – the highest standards for the longest product life

Install a hansgrohe product, and you know you'll be able to enjoy it for years to come. Offering customers the highest quality at all times is a fundamental part of our philosophy. We have been manufacturing bathroom and kitchen products for over 120 years, and we are proud of our intensive quality control processes, practiced around the world.

We offer a voluntary 5 year guarantee, as well as a guaranteed 15 year parts availability after product discontinuation

\*For more information, visit: [hansgrohe.com/guarantee](https://www.hansgrohe.com/guarantee)

# Taking responsibility – acting sustainably

We focus on three areas of accountability: responsible management, social action and ecological awareness. We believe this is the only way to be successful, both now and in the future.

This is something we put into practice worldwide, and have been doing so for many years. This includes ensuring we have an environmentally conscious production process, and mindfully employ people and other resources.

At Hansgrohe, we are in the process of taking giant steps forward to help minimise climate change. By 2030, our aim is to make the entire company, including our products, climate neutral. To implement this, we carefully choose our raw materials, packaging and logistics based on their climate impact.

# Making food preparation a pleasure

The kitchen is the heart of your home – the place where you most need comfort, design and efficiency. That's why we're always developing new ideas to improve your space. Our sophisticated technology and ergonomic solutions make your work in the kitchen easier than ever.

## Welcome to the ComfortZone

Whether high, swivelling or extendable – with ComfortZone you have more freedom of movement and space. The ability to swivel the spout is especially practical, making switching between different sinks or washing different items easier than ever.

## Your workflow made easy

For hansgrohe taps with pull-out functionality, the innovative sBox keeps things neat around your sink. The hose slides smoothly and quietly back into the sBox, which is inconspicuously installed under the sink. This allows the tap to be extended up to 76cm, extending the working radius of your sink beyond the standard 50cm, and allowing for easy filling of large containers and plant watering. It's efficient multitasking at its best.

## Technologies that inspire

The best products are the ones that enrich people's lives - and sometimes, it is the smallest technologies that make the difference. There's Select technology, which is just one button that brings a whole new ease of use to your home. Or QuickClean, a clever and time-saving anti-limescale solution. hansgrohe technologies make your kitchen more enjoyable to use and easier to clean.

## Adaptable to every situation

With kitchen windows that open inwards, conventional taps often get in the way. A hansgrohe tap with TiltFunction solves this problem. It can be easily lifted and lowered, so that the window can be opened and shut easily.

## Low pressure solutions

Kitchen taps equipped with LowPressure technology can be used at sinks with a water pressure of just 0.2 bar. A low pressure fitting for cold water pipes with boiler/heat storage.

## The right tool for the job

From filling a vase to washing delicate fruit, there are a lot of different tasks that are performed at the sink. That is why we offer taps with a variety of different spray types, so you can switch to the right choice for the right task quickly and easily.

### **Laminar spray**

Crystal-clear spray for the sink with no air mixed in, perfect for quickly filling containers.

### **Normal spray**

Full spray enriched with air that feels lovely and helps with all sink-based routines.

### **Shower spray**

Resource-conserving and efficient kitchen spray that can also be used to quickly rinse food.

### **SatinFlow spray**

Flat, super-soft spray that does not splash, is highly efficient and conserves resources.

# FinishPlus – all eyes on the high-quality sink

Kitchen design is all about unique style. You can go wild with vibrant colours with the FinishPlus surface finishes from hansgrohe. High-quality metallic shades and modern matt hues are all you need for personal fulfilment. The kitchen can be designed using colours to suit personal taste.

- High-quality finishes provide a variety of design options.
- FinishPlus creates elegant accents and enhances the style of the room. The metallic surface finishes and trendy matt colours find unique ways to bring kitchens to life.
- Relevant complementary products are also available in the same FinishPlus surface finish colours.

## PVD coating

A PVD coating is vapourised molecule by molecule in the vacuum coating process to create a robust finish with a vibrant colour

The durability has been tested, resulting in a surface finish that lasts for years

## Lacquer coating

A specialised lacquer is applied in several steps to create a bold and intense surface finish

The durability has been tested, resulting in a surface finish that lasts for years

**Matt Black**

Getting back to basics with black and white contrasts.

**Brushed Black Chrome**

A dark surface creates a sophisticated aesthetic.

**Chrome**

Timeless classic paired with dainty elegance.

**Stainless Steel Finish**

Harmony and a clear aesthetic.

# S71

---

Minimalist design,  
maximum choice

**At a glance:**

- Resistant to abrasive substances such as fruit acids
- Rustproof, heat resistant and hygienic
- Additional reinforcement bracket ensures tap stability
- Different sink sizes guarantees maximum flexibility
- Three installation options: surface-mounted, flush-mounted and under-mounted
- Smooth corners for easy cleaning

## High quality and robust

These 1mm thick, hand-welded stainless steel sinks shine with high quality workmanship, boasting precisely manufactured edges and 10 mm corner radii. The frame on the L version is 2 mm reinforced, ensuring complete sink stability. Stainless steel is robust enough to withstand contact with corrosive substances such as fruit acid.

## Stable and easy to install

All sinks are equipped with a reinforcement bracket and double the material thickness. This ensures a stable tap fixture and no sink movement.

## Heat resistant

Stainless steel is unaffected by extreme temperature changes and is completely rustproof.

Natural perfection

## **At a glance:**

- Resistant to abrasive substances such as fruit acids
- Heat resistant and hygienic
- Colour is resistant to food stains
- SilicaTec is made up of quartz particles, which offer impact, fracture and scratch resistance
- The water repelling effect allows water to drain off almost residue-free
- Thanks to different colour options, you can be even more creative in the kitchen
- Different sink sizes guarantees maximum flexibility
- Different installation options: surface- and under-mounted

## Natural

Whether in graphite black, stone grey or concrete grey, the material feels tactile and natural to touch. The smooth, pore-free surface prevents water from penetrating and dirt from sticking.

## Resistant

SilicaTec is made up of quartz particles, which offer impact, fracture and scratch resistance. It is unaffected by heat and won't fade in the light, ensuring the colour remains true for many years to come.

## Water repelling effect

The water repelling effect allows water to drain off almost residue-free. The quality of the material also prevents food stains and other discolouration.

# Aquno Select M81

---

Perfecting your workflow  
in the kitchen

Multiple awards

# Find your flow

A good chef knows that it's the highest quality ingredients that make a perfect meal. We believe that begins with food preparation. That's why we have developed Aquino Select M81, for gentle food cleaning in your kitchen.

The unique design of the Aquino Select M81 kitchen tap means water flows in a new way. The flat SatinFlow stream gently cleans your food, doesn't splash and uses less water when you're washing your hands. Together with the tailor-made sieve, it perfects your kitchen workflow.

Aquino Select M81 makes everything you do at the sink easier. Three different spray types makes this a versatile kitchen all-rounder. You can focus on the cooking, while the Aquino Select M81 acts as the ultimate kitchen assistant.

## At a glance:

- Tailored to the exact dimensions of the splash-free SatinFlow spray, the included multifunction sieve helps you conveniently clean and drain food, hygienically avoiding contact with the sink. The hands-free operation means you can get to work on the next step of meal prep.
- Combined with the sBox, the operating range is extended up to 76 cm
- Select technology makes using the kitchen tap easier than ever before, allowing you to turn water on or off with one click. Operate it with your elbow or even the back of your hand, and keep your taps clean when you're cooking or washing up.
- Swivel range adjustable to 60°, 110° or 150°
- Available in three surfaces: chrome, matte black and stainless steel

## SatinFlow spray – gentle preparation begins with a 20 °C shower

Multitasking with the multifunction sieve: Tailored to the exact dimensions of the splash-free SatinFlow spray, the included multifunction sieve helps you conveniently clean and drain food, hygienically avoiding contact with the sink. The hands-free operation means you can get to work on the next step of meal prep.

A recipe for easy operation

## At a glance:

- Pull-out function provides excellent flexibility
- The sBox ensures that the hose extends quietly and smoothly from the base cabinet up to 76cm
- The Select button lets you start and stop water flow quickly and conveniently
- Several spray types available
- ComfortZone provides plenty of space between the sink and the tap, for fewer water splashes
- Easy window opening when installed in front – simply remove it from the holder and lower it down

Multiple awards

## Where ergonomics meets aesthetics

Do everything with one hand with the Metris Select M71: The spray selection button is positioned directly on the pull-out tap. It allows you to simplify your workflow: after using the lever handle, switch sprays using the switch button and start and stop the water flow by pressing the Select button on top. With Select you can control water precisely and use resources efficiently.

## Convenient operation

With Select technology and a rocker lever positioned at the front edge of the sink, the kitchen tap can be conveniently operated without reaching across the flow of water. By turning the ergonomic rocker lever you can control the water temperature, while tilting it allows you to control the volume of the water flow.

for your kitchen

Multiple awards

# Where minimalism meets attention to detail

Make the perfect kitchen the hallmark of your home. Talis M54 is our flexible design solution for every kitchen shape. Fall in love with the slim tap body in chrome, stainless steel or matte black, and select the right fit for your kitchen – whether you have a large island or compact space with wall units.

The Talis M54 with a round arch is the perfect choice for cooking islands with a sink. Its slim silhouette blends seamlessly into the body, making it an eye-catching addition to the modern eat-in kitchen. You can choose between a pull-out tap and sBox, for even more flexibility, or a swivelling tap. The latter has an adjustable stop, which prevents it from being accidentally unscrewed from the sink area.

The Talis M54 with a U-shaped tap is the perfect solution for kitchens with or without wall cabinets above the sink. With its flexible U-shape and discretely integrated spray former, it's a unique and practical design solution.

For kitchens with wall cabinets above the sink, we have developed the Talis M54 with an L-shape tap. This compact and ergonomic system makes the best use of the space available. The option with the horizontal pull-out tap goes even further to maximise the space, while a gradual adjustable swivel rotation can be adapted to your sink, to prevent it from swivelling too far. The sBox is also available to fit the L-shape design.

## At a glance:

- Pull-out function provides excellent flexibility
- The sBox ensures that the hose extends quietly and smoothly from the base cabinet up to 76cm
- Thanks to different colour options, you can be even more creative in the kitchen
- Several spray types available
- ComfortZone provides plenty of space between the sink and the tap, for fewer water splashes

Multiple awards

reddot winner 2022

# All-round talent

Zesis M33 kitchen taps are full of practical details. They can be swivelled and extended up to 76 cm, while variants with a high water flow can help your workflow. But that's not all: the Zesis M33 with pull-out spray removes dirt from your ingredients in a flash. You can choose between three finishes: chrome, stainless steel and matte black, so you can choose what will best complement your kitchen.

## At a glance:

- Pull-out function provides excellent flexibility
- Thanks to different colour options, you can be even more creative in the kitchen
- Several spray types available
- ComfortZone provides plenty of space between the sink and the tap, for fewer water splashes
- Installation with the sBox lite ensures safe hose routing and keeps things neat under the sink
- Easy window opening when installed in front – simply remove it from the holder and lower it down

For the perfect flow in life

Multiple awards

# Uncompromising indulgence with water

Water is arguably our most vital resource on Earth. If you have delicious drinking water, you get to enjoy a much better quality of life. In many regions of the world, however, the water quality is not so good. We have developed the Aqittura M91, the exclusive tap with an integrated system that gives you delicious water, refined to your unique taste, directly from your tap. So you are always able to enjoy your drinking water to the fullest, eliminate the annoyance of having to transport water bottles, and protect the environment.

## **A reliable way to reduce pollutants and microplastics**

The filtration in the Aqittura M91 system removes up to 95%\* of pollutants, heavy metals, pesticides and insecticides, making it even easier and safer to enjoy water and allowing you to enjoy a more holistic balance. The activated carbon filter in the Aqittura M91 system also filters microplastic particles out of the drinking water. Organic substances such as natural fragrances, flavourings and acids are also neutralised for care-free water consumption.

The tap is designed with two outlets for the separate supply of filtered and unfiltered water.

\*Average of seven typical harmful substances (pesticides and drug residues), calculated by the Zurich University of Applied Sciences (ZHAW)

## Find the perfect system for you

The Aqittura M91 is available in two systems. With the Aqittura M91 SodaSystem, you get all the benefits: Not only can you enjoy your water filtered and mineralised, but also carbonated to your taste as sparkling, medium or still and cooled to between 4 and 12 °C. The level of carbon dioxide added to the water can be set at the touch of a button on the tap itself. The system can also be controlled via the hansgrohe home app. If you can do without cold, carbonated water and just want the water to be filtered and enriched with minerals, the Aqittura M91 FilterSystem is the perfect choice for you.

The **FilterSystem** provides filtered or mineral water at the touch of a button. The integrated valve ensures the purified water flows for as long as the button remains pressed. The mineralisation filter is also easy to install in the sink base unit thanks to its space-saving bracket.

You can use the **SodaSystem's** intuitive control element to choose how you want to enjoy your water: sparkling, medium, still. The SodaBase in the sink base unit features a CO<sub>2</sub> cartridge, the mineralisation filter, the storage tank for purified water, and the cooling unit.

# Balanced supply of minerals

The sensational filtration and mineralisation technology MINTEC® ensures a continuous supply of essential minerals. The carefully coordinated composition of the minerals makes an important contribution to healthy diets and helps the body to maintain the correct mineral balance. Create balance in your water supply with minerals such as magnesium, calcium, potassium and sodium.

## Harmony

Thirst is one of the body's natural ways of warning of a lack of vital minerals in the blood stream. The Harmony mineralisation filter adds magnesium and potassium to the tap water. Magnesium aids the body's metabolic functions, potassium regulates blood pressure, muscle and nerve function.

## Life

The Life mineralisation filter adds calcium, magnesium and potassium to very soft water. Calcium is an essential component in a balanced diet. It helps with metabolism and is required to develop teeth and bones and transmit nerve impulses. Enriching tap water with a combination of calcium, magnesium and potassium turns it into an effective nutritional building block.

## Sport

The Sport mineralisation filter is made for an active lifestyle. The body loses huge amounts of fluids and essential minerals on hot days or during athletic activities. For athletes, sodium, potassium and magnesium are important components in maintaining tissue tension, regulating the water balance in the body, transmitting nerve impulses and regulating blood pressure. They can also help to reduce cramps.

## SodaBase – the heart of the Aqittura M91 SodaSystem

All the functionality in the smallest space: With a height of 476 mm, width of 200 mm and depth of 500 mm, the SodaBase fits in any kitchen cabinet with a width of at least 400 mm. There is a swivel fitting with a threaded connection in the SodaBase so that all standard CO<sub>2</sub> bottles from different manufacturers can be connected in a few simple steps without the use of tools. When purchasing a hansgrohe Aqittura M91 SodaSystem, a CO<sub>2</sub> bottle (425 g for approx. 60 l sparkling water) is always included in the box contents to get you started.

## Discover all the benefits with the hansgrohe home app

With the Aqittura M91 SodaSystem, you can take advantage of all the digital technology of our kitchen innovation. Operate the smart kitchen tap wherever you are and enjoy so many convenient features in the hansgrohe home app.

- Easy to operate via your smartphone
- Digital filter & CO<sub>2</sub> level indicator
- Notification to the app user: capacity levels, cleaning, software updates, error messages
- Stock up on filters and other spare parts via specialist retailers or the usual online shops
- Learn more: Operating instructions are available on the app and in the FAQs

### At a glance:

- Tailored: purified water for all tastes with WaterRefinement Plus
- Convenient: Purified drinking water comes straight out of the tap. No buying, carrying or storage necessary
- Enhanced: Filters with mineralisation (Harmony, Life, Sport), without mineralisation (activated carbon filter) or for hard water regions (ion exchanger and activated carbon filter)
- Varied: sparkling, medium, and still water that can be cooled to between 4 and 12 °C
- Safe: Two outlets for purified and standard tap water
- Sustainable: Plastic is reduced as bottles are not required. This also eliminates unnecessary transportation. The CO<sub>2</sub> bottles are also reusable

# Accessories & Equipment

## **At a glance:**

- Make your daily tasks more efficient with the right accessories
- The elegant design perfectly complements the hansgrohe range
- Maximum functionality, for a more comfortable workflow
- Tailor-made accessories for hansgrohe sinks
- Ideal for working in and outside of the sink
- Perfect for cleaning

## Multifunction sieve

Multitasking in the kitchen is made easier thanks to the multifunction sieve, designed to move smoothly along the S51 and S71 sinks and those with a depth of 400-406 mm. Its use with undermounted sinks depends on the installation.

## Chopping board

The solid oak or walnut chopping board features a guide edge that allows you to slide it along hansgrohe sinks.

## Dishwashing liquid/ lotion dispenser

This practical dispenser is available in three different designs and two different finishes, ensuring it coordinates perfectly with any hansgrohe kitchen tap.

## Mobile draining board

When placed on the edge of the sink, the mobile draining board drains water quickly and efficiently towards the sink. After use, dishcloths can be hung on the plastic frame to dry. This two-part accessory, made of a stainless steel sheet and plastic frame, is dishwasher-safe and can be conveniently stowed away when not required.

## SoftStart spray shaper

The slow-opening aerator in the SoftStart spray shaper gradually increases water volume, for a smoother start to water flow. This reduces splashing, especially in kitchen taps with a high spout.

## Technologies

**Select**  
Start the water, stop the water: One push of a button is all it takes to control the water flow at the sink.

**Select Digital**  
A touch of a button is all it takes for purified water to flow from the tap as still, medium or sparkling.

**Push**  
Filtered or mineral water flows from this user-friendly kitchen tap at the touch of a button.

**Comfort Zone**  
Ensures maximum room to move at the sink, both in terms of height and the ability to swivel from side to side.

**sBox Kitchen**  
Smooth and protected hose guidance. The pull-out spray can be extended to max. 76 cm.

**Quick Clean**  
Limescale deposits and dirt can be simply rubbed off using a finger, creating less of a need to clean.

**EcoSmart**  
Tap that consumes just 6 l/min and thus reduces water and energy costs. Good for the environment and people's wallet.

**AirPower**  
Mixes water with air. For a smooth, lower-splash water spray and light yet full shower droplets.

**CoolStart**  
Eco-friendly tap that conserves precious resources, reduces CO<sub>2</sub> emissions and cuts costs.

**Pull-out**  
A pull-out spray or spout enormously expands the operating radius at the sink.

**Tilt Function**  
Sink in front of the window? This kitchen tap can be easily removed from its holder and placed on its side.

**Low Pressure**  
Low-pressure technology enables use at pressures as low as 0.2 bar. Suitable for boilers/heat exchangers.

**Two Outlets**  
Separate pipelines for purified and standard tap water provide reassurance when pouring.

**Memory Function**  
This can be used to accurately fill various drinking vessels. The water flow stops automatically.

**hansgrohe home App**  
The app provides important information about the kitchen tap, such as capacity levels and more.

## Spray modes

**Laminar Spray**  
Crystal-clear spray for the sink with no air mixed in, perfect for quickly filling containers.

**Normal Spray**  
Full spray enriched with air that feels lovely and helps with all sink-based routines.

**Shower Spray**  
Resource-conserving and efficient kitchen spray that can also be used to quickly rinse food.

**Satin Flow Spray**  
Flat, super-soft spray that does not splash, is highly efficient and conserves resources.

## Sink installation options

**Top Mounted Installation**  
Surface-mounted installation: The sink is inserted from above into a cut-out in the worktop.

**Flush Mounted Installation**  
Flush-mounted installation: The sink is installed flush with the worktop to create a smooth transition between worktop and sink.

**Under Mounted Installation**  
Under-mounted installation: The sink is mounted below the cut-out and is therefore almost invisible, making the kitchen look more spacious.

## Sink surfaces

When choosing the surface, each order number (#) has 8 digits, for example 28500, -000 = chrome
